

# **Barral Institute Case Study**

## **Visceral Manipulation - Extremity Pain**

### **Bill Christie, Massage Practitioner**

#### **Patient Age / Gender**

Female

#### **Patient Symptoms**

Left leg and right knee pain.

#### **Evaluation / Treatment**

2 Visceral Manipulation sessions. Listening posterior to colon, felt issue was close to spine. Suggested she see her MD for further tests.

#### **Outcome**

Patient did not return for 8 months. When she returned, the patient said "had I not pointed out my finding she would be dead." She had a tumor (fast growing) beside her spine.
